DETAILED ACTION

Drawings

1. Figures 1, 2(a), 2(b), 2(c), and 2(d) should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-16 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new apparatus and method for color converting, which is capable of preventing the appearance of granularity in color image on an output device while reducing deviations ion color hue (specification, page 10, lines 19-23).

Particularly, the new apparatus and method comprise the following features, which the prior art taken either singly or in combination does not teach:

- extracting another output color component having an intermediate output gradation level that is intermediate among the output gradation levels in the output color

data; and correcting the intermediate output gradation level based on correction characteristics of the maximum-gradation-level preserving portion/step, and setting the corrected intermediate output gradation level as a final output gradation level for the extracted output color component in the corrected output color data (see independent claims 1 and 9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
